

Devon Bull

Solutions Architect

I take software from architecture through delivery and support. My work includes a solo cloud-console migration for Apple and engineering leadership on Chick-fil-A delivery integrations.

Experience

Solutions Architect at Big Nerd Ranch

July 2018 to present

Cloud Portal

Client	Period	Project role
Apple	October 2024 to present	Solutions Architect

Porting the Third Party Cloud Console into Portal and implementing an LLM chat interface.

- Responsible for porting the Third Party Cloud Console into Portal.
 - Implemented an LLM chat interface.
-

A cloud console, rebuilt

Client	Period	Project role
Apple	July 2022 to October 2024	Solo engineer

Rebuilt an Angular application in React as the sole engineer, while adding features and supporting legacy applications.

- Owned architecture, implementation, delivery, and ongoing support for legacy applications.
- Ported the Angular application to React while adding new features.

Delivery integrations in production

Client	Period	Project role
Chick-fil-A	2020 to 2022	Project engineering lead

Led engineering for third-party delivery integrations, combining feature delivery with service reliability and partner coordination.

- Implemented combo meals on UberEats.
- Coordinated with DoorDash engineering on checkout support in the Chick-fil-A iOS app.
- Oversaw and helped implement the move to AWS CloudFormation.
- Improved service logging, monitoring, and observability.

AWS CloudFormation · Service observability

Chatbot services and integrations

Client	Period	Project role
Apple	2018 to 2020	Backend lead

Led backend work, implemented Apple Card integration, and contributed to frontend and runtime upgrades.

- Implemented Apple Card integration and helped coordinate launch.
- Helped rewrite the frontend from Angular 1 to Vue.
- Refactored a critical service from ES5 to ES6 and helped upgrade Node.js.
